User Instructions

See “*Minolta Plugin, Document Version F*”.

Prerequisites

- This plugin requires a Geomagic product listed in the heading. To verify your current version, launch the application and select **Help -> About Geomagic ProductName**. The text box at the top of the dialog indicates the current software version.

Installation

1. Verify installation of Geomagic product listed in the heading.
2. Log in to Windows as a user with administrative privileges.
3. Verify installation of the newest drivers that come with the Minolta equipment.
4. Run **MinoltaSetup10.exe**.
5. On the Custom Setup screen, specify the Geomagic application (Studio and/or Qualify) with which you want to use the Minolta plugin.
6. Follow other on-screen prompts and click **Finish** when installation is complete.
7. Start the Geomagic application and verify that Minolta appears on the Plugins menu.

New Features

- This plugin is implemented with the new Geomagic Range Scanner SDK, so many elements of the user interface are streamlined. Most notably, the photogrammetry controls are better integrated into the main dialog.
